18 **TO THE HONORABLE COURT, ALL PARTIES, AND THEIR COUNSEL OF**  
19 **RECORD:**  
20

21 NOTICE IS HEREBY GIVEN that on \_\_\_\_\_ date, or as soon thereafter as this  
22 motion may be heard in Department 401 of the Los Angeles County Superior Court,  
23 Juvenile Division, located at 201 Centre Plaza Drive, Monterey Park, California, counsel  
24 for minor will move the Court for an order authorizing minor, [CLIENT name]  
25 (hereinafter referred to as "[CLIENT]") to continue receiving hormone therapy treatment  
26 and for other gender affirming care, as needed, to be authorized by [CLIENT]'s Children's  
27 Social Worker (CSW).  
28

1           This motion is based upon the points and authorities enumerated below, and such  
2 other oral and/or documentary evidence and argument as may be presented at the time of  
3 the hearing.

**STATEMENT OF FACTS**

**I. Minor [CLIENT] Has Been Under This Court’s Jurisdiction for Over \_\_\_\_\_ Years Due to the Actions of His Parents and Their Failure to Reunify**

Minor [CLIENT] (he/him), now seventeen years old, came to the attention of this Court on \_\_\_\_\_ date, when the Department of Children and Family Services (DCFS) filed a Welfare and Institutions Code (WIC) section 300 petition alleging he was a person described by subdivision (b) due to the actions of both his mother, [MOTHER NAME] (hereinafter “mother”) and his father, [FATHER NAME] (hereinafter “father”). (WIC 300 Pet., filed \_\_\_\_\_ date.) The day after, the Court detained [CLIENT] and his sibling from their mother’s care and placed them with their father. (Min. Order dated \_\_\_\_\_ p. ) On \_\_\_\_\_, the Court sustained the a-1, b-1, b-3, and j-1 allegations in the petition, finding that mother physically abused [CLIENT] and that she and father both neglected his emotional and mental health needs. (Min. Order dated \_\_\_\_\_, p. 1.)

**A. This Court Terminated Mother’s Family Reunification Services in \_\_\_\_\_, After Finding Her Progress Had Been “Minimal to None” After Four Years In The System.**

Throughout the course of this case, mother expressed her disinterest in parenting or caring for [CLIENT]. In an interview conducted in \_\_\_\_\_ date which was submitted to the court through a Last-Minute Information (LMI), mother told the CSW that she didn’t want her children back. (LMI dated \_\_\_\_\_, p. 3.) Despite this statement, the Court ordered individual counseling for both parents to address all case issues and for the parents to “ensure children receive all necessary medical and mental health treatment.”

[CLIENT] and mother were temporarily reunited in \_\_\_\_\_, when [CLIENT] was placed in his mother’s home along with his sibling. (Min. Order dated \_\_\_\_\_ p. 1.) Within three months of being reunited, mother kicked [CLIENT] out of the house. With nowhere to go, [CLIENT] called 9-1-1 after midnight from a nearby Jack-In-The-Box. (Detention Report (Det. Rpt.) Despite the officer’s best efforts “to reason with the mother”

1 for over two hours, mother refused to take [CLIENT] back because he broke the blinds in  
2 the home. (*Ibid.*) According to [CLIENT], this occurred over a week prior and he already  
3 talked to his CSW about the incident. (*Ibid.*) Although mother was unable to remember  
4 when the incident occurred, she told the officer that she had “had enough of [CLIENT]”  
5 and “did not want [him] in the home anymore.” (*Ibid.*)

6 As a result of this behavior by mother, the Department filed a subsequent petition  
7 on behalf of [CLIENT] pursuant to WIC section 342. The court then sustained a b-1  
8 allegation finding that mother excluded “the child from the home, failure to make a plan  
9 for the child and failure to provide for the child endangers the child’s physical and  
10 emotional health and safety and places the child at risk of physical and emotional harm,  
11 damage and danger.” (*Id.* at p. 3.) Two years after the original section 300 petition had  
12 been filed, DCFS reported that “none of the [case plan] ha[d] occurred” and that “[t]he  
13 parents [were] not in compliance with... court orders.” Further, DCFS reported that both  
14 [CLIENT] and mother “refused to see each other” for visitation throughout the course of  
15 the case. (*Ibid.*)  
16

17 In \_\_\_\_\_ at the WIC section 366.21(f) statutory hearing, the Court  
18 determined that mother’s progress on her case plan had been “minimal to none” and,  
19 therefore, terminated family reunification services for mother.<sup>1</sup>

20 **B. This Court terminated Father’s family reunification services over**  
21 **two and a half years ago after determining that Father had made no**  
22 **progress in the case.**

23 Although [CLIENT] and his brother were placed with father when this case began,  
24 they were removed from his care within six months “due to parents not being in  
25 compliance with the current Court orders,” as well as new allegations. (Status Review  
26 Report dated .) Two months later, the Court sustained a-1, b-2, and j-2 allegations naming

27 \_\_\_\_\_  
28 <sup>1</sup> [MOTHER] filed a notice of intent to file a writ petition on \_\_\_\_\_. Mother did not file a timely petition and on  
\_\_\_\_\_, the Second District Court of Appeal designated the writ and case as “non-operative.” No writ is currently  
pending before the appellate court.

1 father in the WIC section 342 petition due to physical abuse, as well as the 387 petition  
2 which included a s-1 allegation for failure to comply with prior court orders.<sup>2</sup> Since that  
3 time, father has not had any visits with [CLIENT]. (See Section 366.26 Rpt. dated  
4 \_\_\_\_\_p. \_\_\_\_; see also  
5 [“Throughout the duration of the case, father has not had any visits with [CLIENT].”].)  
6

7 **C. Since Termination of Family Reunification services, [CLIENT]**  
8 **Expressed interest in Long-term Foster Care and the Current**  
9 **Permanent Plan is Another Planned Permanent Living Arrangement**  
10 **(APPLA).**

11 Once family reunification services were terminated, [CLIENT] expressed interest in  
12 long-term foster care. The Court set a WIC section 366.26 (.26) hearing for  
13 \_\_\_\_\_; on that day, the Court took the hearing off calendar and, per the  
14 Department’s .26 report, ordered the Department to prepare a report to review  
15 [CLIENT]’s permanent planning options.) On \_\_\_\_\_, DCFS then  
16 recommended APPLA as an appropriate plan for [CLIENT]. (The Department also filed a  
17 renewed report reviewing the permanent plan later that month, where it again  
18 recommended APPLA as the appropriate plan for [CLIENT]. On \_\_\_\_\_, all parties  
19 submitted on that recommendation before this Court.

20 **II. [CLIENT] Identifies As A Trans Man And, Under Appropriate Medical**  
21 **Guidance, Has Been Receiving Gender Affirming Care To Bring His**  
22 **External Body In Line With His Gender Identity.**

23 Since a young age, [CLIENT] did not feel that he fit in. (See Letter from Dr.  
24 \_\_\_\_\_ dated, attached as Exhibit A (Ex. A.); Letter from \_\_\_\_\_, LCSW dated  
25 \_\_\_\_\_, attached as Exhibit B (Ex. B.) [“He reports feeling discomfort in his  
26 female gender assignment and has felt aligned with a male identity since first  
27 \_\_\_\_\_  
28 \_\_\_\_\_

1 consciousness.”.) [CLIENT] began experimenting with masculine gender expression and  
2 was considered a “tomboy” at a young age. (Ex. A.) During puberty, [CLIENT]’s feelings  
3 that his gender identity was not congruent with his external body intensified. (*Ibid.*)  
4 Although [CLIENT] attempted to express his feelings to mother at the age of eleven, she  
5 did not accept him. (*Ibid.*) Two years later, [CLIENT] began living “consistently and  
6 successfully in the gender role that is congruent with his identity.” (*Ibid.*)  
7

8         Since 2019, [CLIENT] scheduled multiple intake appointments at LAC+USC’s  
9 Alexis Project with Dr. \_\_\_\_\_ to assess his readiness for hormone  
10 treatment. (Ex. A.) However, due to repeated changes in placement, [CLIENT] was unable  
11 to meet with Dr. \_\_\_\_\_ and her team until \_\_\_\_\_ (*Ibid.*) According to  
12 both Dr. \_\_\_\_\_ and \_\_\_\_\_, a licensed clinical social worker (LCSW),  
13 [CLIENT] meets the criteria for Gender Dysphoria of Adolescence or Adults as defined in  
14 the DSM-V. Further, [CLIENT] “has an excellent understanding” of the risks, benefits,  
15 limitations, and alternatives to gender affirming care. (Ex. A, p. \_\_; Ex. B, p. \_\_.)  
16

17         On \_\_\_\_\_, one year prior to the termination of mother and father’s  
18 family reunification services, Judge \_\_\_\_\_ ordered gender affirming  
19 hormone therapy for [CLIENT]. Since that time, [CLIENT] worked consistently with his  
20 medical team at the Alexis Project, under the supervision of Dr. \_\_\_\_\_, to  
21 continue his hormone treatment. His hormone treatment is regularly monitored, and  
22 [CLIENT] administers the treatment himself. (RPP Rpt. dated \_\_\_\_\_ p. \_\_\_\_ “[CLIENT]  
23 . . . is currently taking weekly hormone shots.”.) [CLIENT]’s CSW, \_\_\_\_\_, regularly  
24 picked up and delivered this treatment to [CLIENT] for more than a year and a half.  
25  
26  
27  
28

1 Despite [CLIENT]’s numerous placements during this period, he remained consistent with  
2 his hormone treatment and all other necessary medical meetings with this team at the  
3 Alexis Project.<sup>3</sup> [“Further, this CSW would visit [CLIENT] weekly to provide him with his  
4 dose of testosterone injections.”].)

5  
6 [CLIENT] is also interested in other gender affirming medical care and, in  
7 \_\_\_\_\_, he met with LCSW \_\_\_\_\_, to determine if he would be a  
8 candidate for top surgery.<sup>4</sup> (Ex. B.) In her letter of recommendation, Ms. \_\_\_\_\_  
9 stated that chest masculinization surgery is “medically necessary for [CLIENT]” and that  
10 “it is essential for his continued mental, emotional and physical health” that he receive  
11 this gender-affirming care. (*Ibid.*) During this meeting, [CLIENT] and Ms. \_\_\_\_\_  
12 discussed [CLIENT]’s readiness for surgery, including [CLIENT]’s relationship to his  
13 gender, his gender dysphoria, his body, and his future goals for gender expression. (*Ibid.*)  
14  
15  
16  
17  
18  
19  
20

21 \_\_\_\_\_  
22 <sup>3</sup> [CLIENT] has been away from care since \_\_\_\_\_. While away from care, [CLIENT] has been unable  
23 to access his regular testosterone dosage.

24 <sup>4</sup> According to John Hopkins School of Medicine, top surgery is “another name for chest masculinization or feminization.  
25 Using one of several surgical approaches, surgeons augment or remove breast tissue, and in some cases reshape and  
26 reposition the nipples[.]” (See *Top Surgery (Chest Feminization or Chest Masculinization)*, John Hopkins Medicine  
27 <[https://www.hopkinsmedicine.org/health/treatment-tests-and-therapies/top-  
28 surgery#:~:text=Top%20surgery%20is%20another%20name,nipples%20for%20an%20affirming%20look](https://www.hopkinsmedicine.org/health/treatment-tests-and-therapies/top-surgery#:~:text=Top%20surgery%20is%20another%20name,nipples%20for%20an%20affirming%20look)> [as of Jan. 5,  
2023].) This procedure “removes or augments breast tissue and reshapes the chest to create a more masculine or feminine  
appearance for transgender and nonbinary people.” (*Id.*) Most surgeons and insurance companies require one letter of  
recommendation for top surgery and two letters of support for bottom surgery. (See e.g., *Top Surgery for Transgender Men  
and Nonbinary People*, The Mayo Clinic <[https://www.mayoclinic.org/tests-procedures/top-surgery-for-transgender-  
men/about/pac-20469462](https://www.mayoclinic.org/tests-procedures/top-surgery-for-transgender-men/about/pac-20469462)> [as of Jan. 5, 2023] (“World Professional Association of Transgender Health (WPATH) standards  
of care criteria requires obtaining one letter of support from a mental health provider competent in transgender health. You’ll  
need a mental health evaluation to receive a letter of support.”).) [CLIENT] has expressed an interest in top surgery and met  
with LCSW Tricia Kayiatos-Smith to begin the recommendation letter process.

1 [CLIENT] was also referred to the DCFS Tailored Services Program<sup>5</sup> and receives  
2 services from the LA LGBT Center’s RISE program.<sup>6</sup> According to [CLIENT], neither  
3 mother nor father have supported [CLIENT] in seeking gender affirming care or using  
4 [CLIENT]’s chosen name and pronouns; although Dr. \_\_\_\_\_ and the medical  
5 team at the Alexis Project do not recommend stopping hormone treatment, both father  
6 and mother object to the continuation of [CLIENT]’s gender affirming care, resulting in  
7 the current need to brief this issue before the Court.

---

24 <sup>5</sup> The DCFS Office of Equity’s Tailored Services Program began in March of 2022. Services are provided for foster youth  
25 based on SPA location; partnering organizations include Penny Lane Centers (SPAs 1 and 7), The Help Group –  
26 Kaleidoscope (SPA 2), the LA LGBT Center (SPAs 3, 4, 5, and 6), the Long Beach LGBTQ Center (SPA 8). The program is  
27 available to LGBTQ+ children and youth, starting at age 2, participating in emergency response referrals and/or with open  
28 DCFS services, as part of prevention, intervention, reunification, and after care services, including current and former  
Transition Age Youth (TAY), ages 18 to 25.

<sup>6</sup> The LA LGBT Center is the largest LGBT organization in the world. The RISE (Recognize Intervene Support Empower)  
program works with youth, parents, caregivers, and professionals to better support LGBTQ+ youth in systems of care.  
Through this program, [CLIENT] has received multiple chest binders, has met with LGBTQ+ case managers, and has been  
connected with an LGBTQ+ therapist.

1 MEMORANDUM OF POINTS AND AUTHORITIES

2 **A. Introduction**

3  
4 Pursuant to WIC section 362, subdivision (a), the juvenile court is authorized to  
5 make any and all “reasonable orders for the care, supervision, custody, conduct,  
6 maintenance, and support” of a child declared a dependent of the court. Further, WIC  
7 section 369, subdivision (b) authorizes the court to make “an order authorizing the  
8 performance of the necessary medical, surgical, dental, or other remedial care for” a minor  
9 in need of such treatment “upon the written recommendation of a licensed  
10 physician...after providing due notice to” a parent who is unable or unwilling to authorize  
11 such treatment. Finally, WIC section 369 subdivision (c) states that the parents or  
12 guardians of a dependent child still have the authority to consent to all non- “ordinary”  
13 medical, dental, and surgical care, unless “it appears to the court that there is no parent,  
14 guardian, or person standing in loco parentis capable of authorizing or willing to authorize  
15 medical, surgical, dental or other remedial care or treatment for the dependent child.”  
16 (WIC § 369, subd. (c); c.f., *San Joaquin County Human Services Agency v. Marcus W.*  
17 (2010) 185 Cal.App.4th 182 [holding WIC § 362 inapplicable where the agency did not file  
18 a WIC § 300 petition to declare the child a dependent].) In this situation, after giving  
19 notice to the parents, the Court may allow the child’s social worker to consent to  
20 treatment. (See WIC § 369, subd (c).)

21  
22 In the case at bar, this Court has the authority to override both parents’  
23 unwillingness to consent to [CLIENT] receiving gender affirming care. Even if parents  
24 refuse to provide consent for [CLIENT] to continue hormone therapy and to receive other  
25 gender affirming care, this Court has the authority to override their unwillingness to  
26 consent pursuant to WIC sections 362, subdivision (a), and 369, subdivisions (b), and (c).  
27  
28

1       **B. Under California Law and Considering All Relevant Factors, This Court**  
2       **Can and Should Authorize Continued Hormone Therapy and Other**  
3       **Necessary Gender Affirming Care For [CLIENT].**

4               **1. California case law and statutes provide this Court with broad**  
5               **authority to authorize medical care over parents’ objections.**

6               Once a child is adjudged to be a dependent of the court under WIC 300, the court  
7       may “make any and all reasonable orders for the care, supervision, custody, conduct,  
8       maintenance, and support of the child, including medical treatment[.]” (WIC § 362 subd  
9       (a); *In re S.P.* (2020) 53 Cal.App.5th 13, 17, *review denied* Nov. 10, 2020.) While the  
10      California Family Code (Fam. Code.) contemplates a parent must give consent to such a  
11      procedure, this requirement is not without exception. (See Fam Code §§ 6903, 6910.) As  
12      such, WIC section 362 subdivision (a) expressly gives the juvenile court authority to make  
13      all reasonable orders relating a dependent child’s medical treatment; moreover, “[n]o  
14      statute restricts that authority.” (*In re Christopher I.* (2003) 106 Cal.App.4th 533, 555.)  
15      Consequently, the juvenile court has authority “to obtain care – including medical care –  
16      in the dependent child’s best interests[.]” (*In re S.P., supra*, 53 Cal.App.5th at p. 17  
17      (quoting *In re Christopher I., supra*, 106 Cal.App.4th at pp. 554-555).)

18              Additionally, when reunification services are terminated for a family, the state’s  
19      interest in providing stability to the dependent children “requires the court to concentrate  
20      its efforts...on the child’s placement and well-being,” rather than on a parent’s challenge  
21      to or disagreement with a court order. (See *In re Marilyn H.* (1993) 5 Cal.4th 295, 307.)  
22      Further, the parent’s liberty interest in the care, custody, and control of their child, while  
23      protected by the Fourteenth Amendment to the U.S. Constitution, is not an absolute right.  
24      (*Santosky v. Kramer* (1982) 455 U.S. 745; U.S. Const., 14th Amend., § 1.) The State is “the  
25      26      27      28

1 guardian of society’s basic values.” (*In re Petra B.* (1989) 216 Cal.App.3d 1163, 1171.)

2 Under the doctrine of *parens patriae*, the State has a duty to protect children. (*Ibid.*; see  
3 also, *Prince v. Massachusetts* (1944) 321 U.S. 158, 166.) State officials may interfere in  
4 family matters to safeguard the child’s health, educational development, and emotional  
5 well-being. (*In re Petra B.*, *supra*, 216 Cal.App.3d at p. 1171.)

7 **2. This Court must consider several factors in weighing whether to**  
8 **exercise its authority to order medical care over parents’ objections.**

9 One of the most basic values protected by the state is the sanctity of human life.  
10 (See U.S. Const., 14th Amend., § 1.) Where parents fail to provide adequate care—  
11 including medical care— for their children, the state is justified in intervening. (*In re*  
12 *Petra B.* (1989) 216 Cal.App.3d 1163, 1171.)

14 However, since the state must first consider the wishes of the parents in accordance with  
15 basic due process protections, it carries the burden of justification before  
16 abridging parental autonomy by substituting its judgment for that of the parents.<sup>7</sup> (*In re*  
17 *Phillip B.* (1979) 92 Cal.App.3d 796, 801-802 (“*Phillip B.*”).) The resulting standard for the  
18 trial court to apply in such circumstances is a balancing test that appropriately weighs the  
19 wishes of the child and/or Department against the due process rights of an objecting  
20 parent. In *Phillip B.*, the appellate court described several factors that must be taken into  
21 consideration to appropriately balance these interests:

24 “The state should examine the seriousness of the harm the child is  
25 suffering or the substantial likelihood that he will suffer serious harm;  
26 the evaluation for the treatment by the medical profession; the risks  
27 involved in medically treating the child; and the expressed preferences  
of the child. Of course, the underlying consideration is the child’s

28 <sup>7</sup> This burden is also carried by a petitioning party requesting such an abrogation. This extends to [CLIENT]’s request before this Court.

1 welfare and whether his best interests will be served by the medical  
2 treatment.”

3 (*Phillip B.*, *supra*, 92 Cal.App.3d at 802; see also *In re Petra B.* (1989) 216 Cal.App.3d  
4 1163, 1171 [affirming *Phillip B.*, agreeing that a parent’s constitutional protection of  
5 parental autonomy is not absolute].) The juvenile court’s discretion under these  
6 circumstances is “very...extensive” and the court’s “determination will not be reversed  
7 save for clear abuse of that discretion.” (*In re Robert D.* (1984) 151 Cal.App.3d 391, 396;  
8 see also *In re Eric B.* (1987) 189 Cal.App.3d 996, 1005 [citing *Phillip B.* for the standard  
9 regarding entering medical decisions over a parent’s objection, and also reviewing  
10 jurisprudence regarding appropriate exercise of *parens patriae* jurisdiction for ordering  
11 medical treatment over a parent’s objection].)  
12  
13

14 **3. In balancing interests, this Court must also consider [CLIENT]’s right**  
15 **to receive gender affirming care under California law, and under**  
16 **specific guidance from the California Department of Social Services**

17 LGBTQ+ foster youth in California have a variety of rights that are specific to  
18 protecting and affirming their sexual orientation, gender identity, and gender expression.  
19 Under the Foster Youth Bill of Rights, dependent youth have a right to be involved with  
20 developing their case plan, including “the development of case plan elements related to  
21 placement and gender affirming health care, with consideration of their gender identity.”  
22 (WIC § 16001.9, subd. (a)(19).) Further, guidance provided by the California Department  
23 of Social Services (“CDSS”) via All County Letter (ACL) 19-27 states that “AB 2119 [signed  
24 into law in September of 2018,] clarifies the right to receive gender affirming physical  
25 health care and gender affirming mental health care is subject to existing laws governing  
26 consent to health care for minor and nonminor dependents in foster care and does not add,  
27  
28

1 limit, or otherwise affect applicable laws governing consent to health care.” (ACL 19-27,  
2 pp. 1-2, found at [https://www.cdss.ca.gov/Portals/9/ACL/2019/19-27.pdf?ver=2019-05-09-  
3 101636-810](https://www.cdss.ca.gov/Portals/9/ACL/2019/19-27.pdf?ver=2019-05-09-101636-810).) The letter continues by stating that:

4 “It is the role of the child welfare agency and foster caregiver to support a  
5 minor/nonminor dependent’s ability to access gender affirming physical  
6 health care and gender affirming mental health care while recognizing that  
7 community support is an important aspect of affirming an individual’s  
8 transition, and ultimately their overall wellness.”

9 (ACL 19-27, pp 6-7.) Gender affirming health care is defined as “medically necessary  
10 health care that respects the gender identity of the patient, as experienced and defined by  
11 the patient[.]” (WIC § 16010.2, subd. (b)(3)(A).) Such health care may include: “(i)  
12 Interventions to suppress the development of endogenous secondary sex characteristics.  
13 (ii) Interventions to align the patient’s appearance of physical body with the patient’s  
14 gender identity. (iii) Interventions to alleviate symptoms of clinically significant distress  
15 resulting from gender dysphoria [...]” (WIC § 16010.2, subd. (b)(3)(A)(i-iii).)  
16

17 Additionally, ACL 19-27 clarifies that if a minor is under the age of 18 and is  
18 seeking surgical or medical treatment, “a parent or legal guardian of said minor generally  
19 must provide consent, unless the juvenile court has limited the parents’ medical rights.”  
20 (ACL 19-27, p. 8.) ACL 19-27 advises county welfare agencies that the juvenile court may  
21 grant the CSW or juvenile probation officer the authority to consent to “medical, surgical,  
22 or other remedial gender affirming care upon the recommendation of the attending  
23 physician and surgeon” if, after due notice, “no parent or guardian is capable of  
24 authorizing or willing to authorize” such care. (*Ibid.*)  
25  
26  
27  
28

1                   **4. Applying the *Phillip B.* factors to this case weighs heavily in favor of**  
2                   **authorizing [CLIENT]’s request for an order for gender affirming**  
3                   **care over parents’ objections.**

4                   In this case, [CLIENT] was adjudicated a dependent of this Court over four and a  
5                   half years ago. While this Court offered family reunification services to both mother and  
6                   father, the services proved unsuccessful, resulting in termination of services in \_\_\_\_\_.  
7                   The permanent plan is not to reunify [CLIENT] with either of his parents; rather, all  
8                   parties have submitted to the Department’s APPLA recommendation for [CLIENT].  
9                   [CLIENT] will be eighteen on [DOB], and the Department was ordered to provide services  
10                  to prepare [CLIENT] for long-term foster care. Even though mother and father’s parental  
11                  rights have not been terminated, efforts to reunify [CLIENT] with either of his parents  
12                  have been terminated and [CLIENT] remains a dependent of this court.  
13

14                  As such, the state’s interest in providing stability to [CLIENT] requires that the  
15                  Court concentrate its efforts on [CLIENT]’s well-being rather than any challenges or  
16                  objections brought by father and mother. In applying the *Phillip B.* standard to this case,  
17                  this Court can, and should, order the continuation of [CLIENT]’s hormone treatment, as  
18                  well as other gender affirming care. Each prong of the *Phillip B.* standard is discussed in  
19                  turn.  
20

21                  First, this Court must consider “[t]he seriousness of the harm [CLIENT] is suffering  
22                  or the substantial likelihood that he will suffer serious harm.” (*Phillip B., supra*, 92  
23                  Cal.App.3d at p. 802.) According to [CLIENT]’s medical team, [CLIENT] will suffer serious  
24                  harm if this course of treatment was denied to him. In her letter to the juvenile court  
25                  dated \_\_\_\_\_, Dr. \_\_\_\_\_ stated, “I believe [CLIENT] would  
26  
27  
28

1 benefit greatly both medically and psychologically from hormone therapy.” (Ex. A.)

2 Similarly, in her letter of recommendation for gender affirming surgery in \_\_\_\_\_,

3 LCSW \_\_\_\_\_ stated, “It is my professional clinical opinion that this

4 procedure is medically necessary for [CLIENT] and that it is essential for his continued

5 mental, emotional and physical health.” (Ex. B.)

6  
7 There is an abundance of information regarding the harm that transgender people  
8 suffer when they are denied access to gender affirming care. Specifically, the Williams  
9 Institute of UCLA School of Law articulated the harm associated with denying gender  
10 affirming healthcare to those in need:

11  
12 “Research shows that gender-affirming care improves mental health and  
13 overall well-being for transgender people, including youth. A 2020 study  
14 published in *Pediatrics* found that access to pubertal suppression treatment  
15 was associated with lower odds of lifetime suicidal ideation among  
16 transgender adults. [...] Research conducted by the Williams Institute noted  
17 that fewer transgender people who wanted and received gender-affirming  
18 medical care attempted suicide in the prior year compared to those who did  
19 not receive such care (6.5% vs. 8.9%, respectively). More generally, research  
indicates that efforts to support transgender youth in living according to their  
internal sense of gender is associated with better mental health and feelings  
of safety at school, while efforts to change the gender identity of transgender  
people (i.e., conversion therapy) are associated with suicidality.”

20 (The Williams Institute of UCLA Law School, *Prohibiting Gender-Affirming Medical Care*  
21 *for Youth* (March 2023), <[https://williamsinstitute.law.ucla.edu/publications/bans-trans-](https://williamsinstitute.law.ucla.edu/publications/bans-trans-youth-health-care/)  
22 [youth-health-care/](https://williamsinstitute.law.ucla.edu/publications/bans-trans-youth-health-care/)> [as of Sept. 19, 2023].) Similarly, a 2022 study by The Trevor Project<sup>8</sup>  
23 found that access to gender affirming healthcare is “significantly related to lower rates of  
24 \_\_\_\_\_  
25 \_\_\_\_\_  
26 \_\_\_\_\_

27 <sup>8</sup> The Trevor Project is one of the leading LGBTQ+ organizations in the U.S. dedicated to LGBTQ+ youth and their mental  
28 health. Their mission is to end suicide among LGBTQ+ youth by creating a more inclusive world where these young people  
can see themselves. They provided crisis services, peer support, public education, advocacy, and research. (See The Trevor  
Project <<https://www.thetrevorproject.org/strategic-plan/>> [as of September 19, 2023].)

1 depression and suicidality among transgender and nonbinary youth.” (Green, DeChants,  
2 Price & Davis, *Association of Gender-Affirming Hormone Therapy with Depression,*  
3 *Thoughts of Suicide, and Attempted Suicide Among Transgender and Nonbinary Youth*  
4 (Apr. 1, 2022) 70 J. Adolescent Health 643.) Since LGBTQ+ youth are four times more  
5 likely to attempt suicide, gender affirming care can be lifesaving. (*Ibid.*; see also The  
6 Trevor Project <<https://www.thetrevorproject.org/strategic-plan/>> [as of Sept. 19, 2023].)  
7

8         Moreover, many national and international medical associations support gender-  
9 affirming care for youth. (See The Transgender Legal Defense and Education Fund,  
10 *Medical Organization Statements*, <[https://transhealthproject.org/resources/medical-](https://transhealthproject.org/resources/medical-organization-statements/)  
11 [organization-statements/](https://transhealthproject.org/resources/medical-organization-statements/)> [as of Sept. 19, 2023].) Most major U.S. medical associations—  
12 including those in fields such as pediatrics, endocrinology, psychiatry, and psychology—  
13 have issued statements recognizing the appropriateness of and need for gender affirming  
14 care for youth, particularly noting the harmful effects of denying access to these services.  
15 (Lindsey Dawson, Jennifer Kates & MaryBeth Musumeci, *Youth Access to Gender*  
16 *Affirming Care: The Federal and State Policy Landscape* (June 1, 2022), Kaiser Family  
17 Foundation <[https://www.kff.org/other/issue-brief/youth-access-to-gender-affirming-care-](https://www.kff.org/other/issue-brief/youth-access-to-gender-affirming-care-the-federal-and-state-policy-landscape/)  
18 [the-federal-and-state-policy-landscape/](https://www.kff.org/other/issue-brief/youth-access-to-gender-affirming-care-the-federal-and-state-policy-landscape/)> [as of Sept. 19, 2023].) The American Medical  
19 Association supports this sentiment, as it opined as recently as March of 2021 that, “[  
20 research has demonstrated that improved body satisfaction and self-esteem following the  
21 receipt of gender-affirming care is protective against poorer mental health and supports  
22 healthy relationships with parents and peers.” (See The American Medical Association,  
23 *AMA Fights to Protect Health Care for Transgender Patients* (Mar. 26, 2021),  
24  
25  
26  
27  
28

1 <[https://www.ama-assn.org/health-care-advocacy/advocacy-update/march-26-2021-state-](https://www.ama-assn.org/health-care-advocacy/advocacy-update/march-26-2021-state-advocacy-update)  
2 [advocacy-update](https://www.ama-assn.org/health-care-advocacy/advocacy-update/march-26-2021-state-advocacy-update)> [as of Sept. 19, 2023].) It further asserts that, “studies also demonstrate  
3 dramatic reductions in suicide attempts, as well as decreased rates of depression and  
4 anxiety.” (*Ibid.*) Thus, considering the mental and physical benefits stated by both Dr.  
5 \_\_\_\_\_ and Ms. \_\_\_\_\_, the overwhelming support of the medical  
6 community generally, and, conversely, the serious harm [CLIENT] would suffer should the  
7 Court refuse to intervene to support [CLIENT]’s care, this factor weighs heavily in  
8 [CLIENT]’s favor.  
9  
10

11 Second, this Court must consider “the evaluation for the treatment by the medical  
12 profession.” (*Phillip B., supra*, 92 Cal.App.3d at p. 802.) The medical profession generally  
13 and [CLIENT]’s medical team more specifically supports gender affirming treatment for  
14 youth who identify as transgender, and, according to the medical profession, that  
15 treatment should not be delayed. (See The American Civil Liberties Union, *Doctors Agree:*  
16 *Gender-Affirming Care is Life Saving Care* (Apr. 1, 2021),  
17 <[https://www.aclu.org/news/lgbtq-rights/doctors-agree-gender-affirming-care-is-life-](https://www.aclu.org/news/lgbtq-rights/doctors-agree-gender-affirming-care-is-life-saving-care)  
18 [saving-care](https://www.aclu.org/news/lgbtq-rights/doctors-agree-gender-affirming-care-is-life-saving-care)> [as of Sept. 19, 2023]; see also The Transgender Legal Defense and Education  
19 Fund, *Medical Organization Statements*,  
20 <<https://transhealthproject.org/resources/medical-organization-statements/>> [as of Sept.  
21 19, 2023]; The Gay Lesbian Alliance Against Defamation, *Medical Association Statements*  
22 *Supporting Trans Youth Healthcare and Against Discriminatory Bills* (Apr. 19, 2021),  
23 <[https://www.glaad.org/blog/medical-association-statements-supporting-trans-youth-](https://www.glaad.org/blog/medical-association-statements-supporting-trans-youth-healthcare-and-against-discriminatory)  
24 [healthcare-and-against-discriminatory](https://www.glaad.org/blog/medical-association-statements-supporting-trans-youth-healthcare-and-against-discriminatory)> [as of Sept. 19, 2023].) The medical profession—  
25  
26  
27  
28

1 on national and international levels—clearly supports gender affirming care as the  
2 appropriate treatment for transgender youth. The medical professionals who have  
3 evaluated and treated [CLIENT] strongly support him continuing to receive hormone  
4 therapy and other gender affirming care. This factor weighs heavily in [CLIENT]’s favor.  
5

6 Third – “The risks involved in medically treating the child.” (*Phillip B., supra*, 92  
7 Cal.App.3d at p. 802.) The risks of harm for gender affirming care are minimal, especially  
8 considering that [CLIENT] would suffer serious harm should his current hormone  
9 treatment be stopped, as discussed *supra*. Prior to beginning hormone therapy over a year  
10 ago, Dr. \_\_\_\_\_ discussed the “risks, benefits, limitations and alternatives” to hormone  
11 therapy with [CLIENT]; some of these risks include “the length of time it would take for  
12 the full benefits to take effect, potentially heightened risk of cancer and risks associated  
13 with reproductive and sexual health.” (Ex. A.) Dr. \_\_\_\_\_ found that [CLIENT]  
14 “had an excellent understanding” and, “[a]lthough he is only 15, he [wa]s able to express  
15 complex thoughts and complex understanding of the risks and benefits of hormone  
16 therapy.” (*Ibid.*) Ultimately, Dr. \_\_\_\_\_ expressed her belief that  
17 [CLIENT] would “benefit greatly, both medically and psychologically” from gender  
18 affirming care. (*Ibid.*) More recently, Ms. \_\_\_\_\_ expressed a similar sentiment,  
19 writing that gender affirming care is “medically necessary for [CLIENT]” and that it is  
20 “essential for his continued mental, emotional and physical health.” (Ex. B.) The minimal  
21 risks that gender affirming care pose have been discussed with—and understood by—  
22 [CLIENT], and his medical team believes that the benefits greatly outweigh any collateral  
23  
24  
25  
26  
27  
28

1 risks. More persuasively, the risk of *not* providing such care, as discussed *supra*, weighs in  
2 favor of [CLIENT]'s request for such care.

3 Finally, this Court must consider [CLIENT]'s expressed preferences, including what  
4 is in his best interest. (*Phillip B.*, *supra*, 92 Cal.App.3d at p. 802.) [CLIENT]'s expressed  
5 preferences have been consistent in asking for and seeking gender affirming care and  
6 LGBTQ+ specific supports. As previously discussed, [CLIENT] has struggled with his  
7 identity and overcame significant institutional and familial obstacles to begin living  
8 "consistently and successfully in the gender role that is congruent with his identity." (Ex.  
9 A.) [CLIENT] has been his own advocate, securing services with the Alexis Project, DCFS'  
10 Tailored Services Program, and the LA LGBT Center's RISE Program. This is in addition  
11 to following the recommendations of medical and mental health professionals to secure the  
12 gender affirming healthcare he currently receives.

13  
14  
15  
16 With respect to what is in [CLIENT]'s best interest, his expressed wishes are in full  
17 alignment with the best interest standard. As discussed with respect to the first and  
18 second prongs of the *Phillip B.* standard, medical professionals recognize that there is a  
19 greater harm to denying gender affirming healthcare than there is any collateral risk or  
20 detriment to a youth who seeks such healthcare. Importantly, [CLIENT] will be turning  
21 18 in August of this year. He is approaching the age of majority, has clearly understood  
22 the options available to him, and the risks, and is firm in his need for ongoing gender  
23 affirming care. Considering his consistency throughout the course of this case regarding  
24 his gender identity and need for gender affirming care, this prong heavily weighs in  
25 [CLIENT]'s favor.  
26  
27  
28

1 Weighing the interests posited by the *Phillip B.* standard is the appropriate  
2 consideration of [CLIENT]’s autonomy and what remains of mother and father’s parental  
3 rights over him. The conclusion heavily weighs in favor of [CLIENT], satisfying this  
4 Court’s obligation to afford both mother and father appropriate due process protections. As  
5 such, this Court has a clear basis and the legal authority to limit mother and father’s  
6 medical rights and grant [CLIENT]’s request.  
7

8 **C. Mother And Father’s Due Process Rights Are Met By Holding A Hearing To**  
9 **Determine Whether This Court Has The Authority To Override Mother**  
10 **And Father’s Unwillingness To Consent To Gender Affirming Care.**

11 Parents involved in dependency proceedings have due process rights of notice and  
12 an opportunity to be heard. (*In re Dakota H.* (2005) 132 Cal.App.4th 212, 222–223; *Ingrid*  
13 *E. v. Superior Court* (1999) 75 Cal.App.4th 751, 756-757.) Of importance is “fairness in the  
14 procedure employed”; this fairness is achieved through a “meaningful hearing” where  
15 parents have “the right to confront and cross-examine witnesses[.]” (*Ingrid E. v. Superior*  
16 *Court, supra*, 75 Cal.App.4th at pp. 756-757.) Thus, if parents involved in dependency  
17 proceedings are afforded a meaningful hearing where they can present their objections  
18 and confront and cross-examine witnesses, their due process rights have been fulfilled.  
19  
20

21 Mother and father’s assertion that [CLIENT] receiving gender affirming care  
22 without their consent violates their parental rights is without merit. [CLIENT] had his  
23 initial appointment at the Alexis Project on \_\_\_\_\_. (Ex. A.) [CLIENT] was also  
24 referred to the LA LGBT Center’s RISE program on \_\_\_\_\_, and services  
25 began shortly thereafter. On \_\_\_\_\_, Judge \_\_\_\_\_ ordered for  
26 [CLIENT] to begin hormone therapy; since that time, DCFS CSW \_\_\_\_\_  
27  
28

1 continues to ensure that [CLIENT] regularly receives and administers his hormone  
2 treatment. Although that order was not made by this Court, this Court and all parties  
3 have been aware of [CLIENT]'s hormone therapy for over a year, per the Department's  
4 own filings in this case.

5  
6 [CLIENT]'s interest in continuing hormone therapy and receiving other gender  
7 affirming care heavily outweighs mother and father's interest in their rights to make  
8 medical decisions, especially since family reunification services were terminated and there  
9 is no plan to ever reunify. [CLIENT] will turn eighteen in eight months and has already  
10 been receiving hormone therapy for over a year and a half. In accordance with *Phillip B.*,  
11 it is in [CLIENT]'s best interest to continue to receive his hormone therapy and any other  
12 gender affirming care that is recommended by his medical team.  
13

14  
15 **CONCLUSION**

16  
17 For the foregoing reasons, [CLIENT] respectfully requests that this Court authorize  
18 him to receive further treatment (including appropriate consultations) from the Alexis  
19 Project and CHLA, including hormone therapy and all other gender affirming care as  
20 recommended by the medical teams to bring his external body into alignment with his  
21 internal male gender.

22 DATED: xxxxxxxx

Respectfully Submitted,

23  
24 CHILDREN'S LAW CENTER OF  
25 CALIFORNIA, CLC \_\_\_
